Let me know if you need any additional info than what is provided by the PPM report.
I asked Bryant to forward it to me as well so I can make sure RM is current as well.

One number that is a little confusing is the total number of properties with access granted - in the update EPA presents daily at 3 pm they include properties that **both** Lard and EPA have received access to. There are a few properties that EPA has that Lard does not (denied or cannot reach homeowner) and a couple properties that Lard has that EPA does not (waiting on signed access via email or fax). So that is why the actual number of properties with access reported by both sides (PPM and Response manager) is a little higher than the EPA number (if anyone asks – I know Bryant asked me multiple times).

Thanks
Danny

See table. Trying to come up with metrics to show status of cleanup. Think about it.

Subject: Lard Oil Update

- **LARD OIL SPILL, DENHAM SPRINGS, LA:** EPA continues to provide RP oversight of the Lard Oil spill cleanup activities that has impacted a residential area. The RP has been removing stained vegetation and has started scraping contaminated surface soils. The RP started air sampling activities on the facility and around the perimeter of the “impact” area of the oil release. EPA reviewed and provide comments back to the RP regarding their “Technical Sampling and Analysis Plan”. EPA received the RP’s “Draft Cleanup Plan” for EPA review/comment which includes indoor air and wipe samples of contaminated properties. Many residents have obtained legal representation which appears to have had an adverse effect on gaining

property access agreements.

LARD OIL – 12:30 pm 8/29/2016	
73	Estimated Total Number of Houses within “Impact Zone”
39	Number of houses Oiled OUTSIDE
7	Number of Houses Oiled INSIDE
46	Number of Houses with Oil in YARD
36	Number of Houses with ACCESS AGREEMENTS Granted to both EPA and Lard
